PACIFIC SHIPYARDS

Custom built for every demand

Pacific Shipyards is a dynamic company that has been combining top quality with custom yachts since 1994. The yard has a wealth of expertise in-house, and performs the hull construction and finish as well as the design and engineering of all Pacific yachts itself. Custom built to every demand, each pocket-sized superyacht developed by Pacific Shipyards is truly one of a kind.

New launch

A perfect example of Dutch craftsmanship, the latest addition to the fleet is the brand-new Pacific Pearl 200. The first model was recently delivered to the full satisfaction of owner and yard alike.

Four series

Pacifics are luxurious and seaworthy steel vessels. The curvaceous lines and elegant details are integrated in a yacht that combines luxury

and design with ease of operation and maximum comfort on the water. The yard synthesises customised work with well thought-out standards and maximum flexibility, using technologies that will take clients wherever they wish to go. Pacific yachts are at ease on any ocean and in any marina.

- Allure is a stylish, reliable Dutch yacht based on traditional lines. The expert use of materials and comprehensive luxury interior make this yacht a true classic.
- Pacific P stands for Italian design combined with typical Dutch craftsmanship of the highest level to create a phenomenal yacht with a Mediterranean flair.
- Pearl is a round-bilged yacht with a flared bow and a compact design that makes her ideal for the French waterways.
- Pacific S features a contemporary character and interior combined with superior performance in a yacht with an international appeal.
